SUMMARY

Front-End Developer with 1+ years of commercial experience — delivering responsive web applications optimized for performance and scalable modern front-end architectures. Have worked on projects from scratch as well as taken over, improved, and optimized existing codebases. Started with Webflow and low-code development, then moved into React, Next.js, and TypeScript. Have additional experience on the backend side: Node.js, REST APIs, and payment systems. Comfortable working in cross-functional teams with designers and backend developers.

EXPERIENCE

Self-Employment

Freelance

Front-End Developer May 2025 - Present

- Developing & editing client projects with React, Next.js, and TypeScript.
- Optimizing performance and code quality of existing front-end codebases.
- Client communication, requirements gathering & technical consulting.
- Collaboration with teams of designers & developers.

DOIDO Market

Startup / E-commerce

Full-Stack Developer & Co-founder Feb 2025 - May 2025

- Designed and implemented a Telegram Web-3 marketplace from scratch.
- Developed client-side app with payment integration.
- Engineered backend for payment processing and transaction handling.
- Integrated Telegram Mini App and bot for user-facing functionality.
- Covered smart contract logic with Jest tests.
- Took the project from development to production independently.

Tresor.tech

Outsource

Front-End / Webflow Developer Mar 2024 - Jan 2025
