SUMMARY

Front-End Developer with 1+ years of commercial experience building web applications across freelance, startup, and outsource formats. Started with Webflow and low-code development, then moved into React, Next.js, and TypeScript. Have additional experience on the backend side: Node.js, REST APIs, and payment systems. Comfortable working in cross-functional teams with designers and backend developers.

EXPERIENCE

Self-Employment

Freelance

Front-End Developer May 2025 - Present

- Developing client projects as an independent developer.
- Client communication and requirements gathering.
- Collaboration with teams of designers and developers.

DOIDO Market

Startup / E-commerce

Co-founder & Full-Stack Developer Feb 2025 - May 2025

- Architected a Telegram NFT marketplace from scratch: tech stack selection and system design.
- Built client-side app with TON payment integration.
- Built backend for payment processing and TON transaction handling.
- Integrated Telegram Mini App and bot for user-facing functionality.
- Covered smart contract logic with Jest tests.
- Took the project from development to production independently.

Tresor.tech

Outsource

Front-End / Webflow Developer Mar 2024 - Jan 2025

- Built React and Webflow websites for client projects.
- Integrated APIs, CRMs, and payment systems into client projects.
- Handled client communication: requirements gathering and technical consulting.
- Improved Core Web Vitals through image optimization, lazy loading, and code splitting.
- Automated client workflows with Make.
- Earned Webflow Partner certification.
- Worked in cross-functional teams with designers and backend developers.

3mpq studio

Startup / Agency

Co-founder & Full-Stack Developer Jul 2023 - Dec 2023

- Built and deployed a Telegram bot with Supabase integration.
- Built a full-stack internal dashboard: frontend, backend API, and deployment.
- Built a website with internationalization and a custom form submission API.
- Implemented UI from Figma designs in collaboration with the designer.
- Optimized Core Web Vitals across all projects.

Logics7

On demand

Front-end / Webflow Developer Nov 2022 - Jun 2023

- Built Webflow websites to client specifications.
- Built a Next.js website with 3D (Spline) and CRM integration.
- Enabled online donations for a charity by integrating a payment API.
- Improved Lighthouse scores and Core Web Vitals across projects.
- Maintained cross-browser compatibility across projects.
